

Thesis Progress - Weekly Report

Student Name	<i>Marsel Berheev</i>
Project Topic	<i>Hallucination detection using models uncertainty signals</i>
Supervisor	<i>Vladimir Ivanov</i>
Date	<i>2025.09.08 - 2025.10.02</i>

Week goals

- Refine thesis topic. Try to concentrate on specific task, rather on whole research field
- Conduct literature review to identify current limitations and research cavepits

Work done this week

#	Task	Hours spent	Status	Result
1	Literature research	3h x 7days total 21 hour	18 papers explored in total	Main research field limitations identified: * Only open models * Issues with long context * High domain specificity * Requires labeling and heavily depends on target quality * No distinguish between hallucination types
2				
3				

References to results

Current issues

#	Description
1	No clear research topic area defined

Plan for next week

#	Task (use S.M.A.R.T.)	Estimation
1	Refine topic	2h
2	First iteration of introduction and related literature sections of thesis	10h
3	Literature research	20h
